

Typéfi[®] Desktop

typefi.com

The efficiencies of automation ... the impact of beautiful design ... the scalability of XML ... the flexibility of single-source publishing ... all on your desktop

A system that makes publishing easier, not harder

No more manual composition. Automated application of styles and branding. Built-in version and quality control. Flexible workflows. Faster production cycles with instant review and feedback. Familiar working environments. Sure sounds easier. That's because Typefi Desktop – based on Typefi Publish – is all about making publishing processes smoother and more productive.

Proven technology built on industry standards

From household names to niche publishers, our customers have tried and tested Typefi Publish and Typefi Desktop in the toughest labs: the marketplace.

Industry standards are at the heart of Typefi Publish. We built it on authoring tools used regularly: Microsoft[®] Word, Inera[®] eXtyles, and other standard XML-editors. We chose the design software that professionals choose – Adobe[®] InDesign – to drive layout and design. We support industry-standard XML-DTDs: NLM, DITA, DocBooks, EPUB and DAISY. We also help publishers meet international accessibility standards as mandated by the United Nations.

A scalable solution that handles multiple formats

Print publishing, web publishing, ebooks, PDFs, custom or specific XML formats – Typefi Desktop can handle it all. What's more, you can do all this from a single source at the press of a button. Now that's scalable.

Software that fits with your systems and processes

Typefi Desktop plugs into widely-used tools such as Word, is run on standard PC and Mac desktops, and is accessed via a web browser interface.

the power of
Typefi Publish
for single-user
desktop
environments

- The power of Typefi Publish in a desktop environment.
- Easy to learn and use.
- Reduces composition time and costs.
- Single-source publishing to multiple outputs.
