

Automated composition solution for scholarly journal and book publishing

Works with industry standard DTDs and XML tools

NLM, DITA, DocBooks, EPUB, DAISY. Typefi® NLM is built on XML specifically for publishers, so it works with most industry-standard DTDs. It can also be customised to work with non-standard XML.

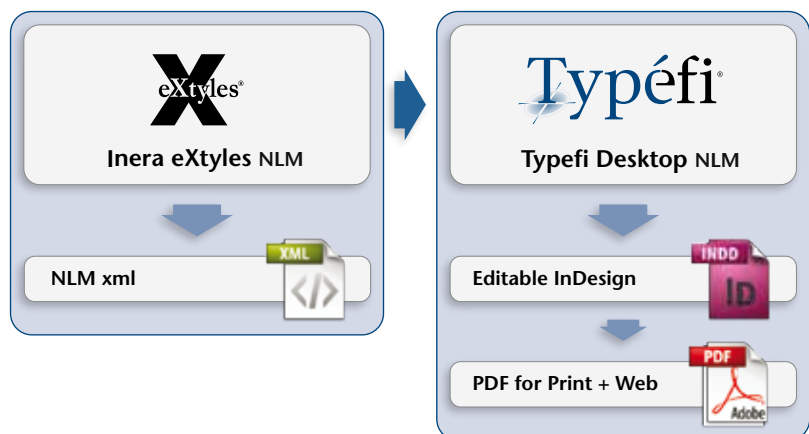

Prepare your NLM content with Inera® eXtyles. Edit your ePub content with the <oXygen/> XML Editor. No coding skills required.

XML content flowed into InDesign for any output

Flow your prepared XML content automatically into richly-designed and formatted InDesign documents. Output the content to print-ready PDFs, web and other XML formats such as ePub and DAISY. Typefi NLM, based on Typefi® Publish, is integrated with Adobe® InDesign, the world's leading layout and design software, to present your XML content at its best.

Handles tables, equations and other complex design elements

- Maths equations
- Tables
- Multi-column spreads
- Column balancing
- Figure placement
- Cross-references
- Footnotes and endnotes
- Indexes
- Widows/orphan correction

Accessibility compliance made easy

Integrate accessible publishing into your everyday workflow with Typefi NLM.

See [Solutions – Accessibility](#) on our website for more information.

WHO uses Typefi NLM

The World Health Organization uses Typefi NLM to publish its journals, books and other publications in a range of accessible formats. Read about it on our website.

Typefi NLM is mainly used by STM and scholarly publishers, but it's suitable for anyone publishing from source XML.

"Increased automation and a more streamlined workflow with eXtyles and Typefi at the core have enabled us to cut journal composition time by more than half."

— Louise Adam, Production Manager,
FASS (Federation of Animal Science Societies)

Modules included

Typefi NLM comes with all the features and tools necessary to produce fully composed journal articles and books using Adobe InDesign. This includes the ability to generate and place tables, size and place figures and inset inline and floating math equations. Typefi NLM also comes with automatic table column alignment and the ability to fix leading on in-line math.

The price of Typefi NLM also includes the cost of creating the InDesign template.

An additional licensed feature is widows and orphans correction.

Typefi NLM is available as a stand-alone desktop product or as a hosted solution with Typefi Cloud.

Key Features

- Design-driven composition software
- Handles complex design elements including equations and tables
- Single-source publishing to print, accessible web-ready PDF, fully editable InDesign documents and EPUBs
- Automated hyperlinks within PDF and within references with the use of DOI and/or PMID functionality
- Automated workflow delivers faster production times and lower costs
- Easy to learn and use
- Requires minimum effort in installation
- Built on standards-based technologies and industry standard applications
- Multilingual publishing with full Unicode support, Western and Central European spelling and hyphenation, and Chinese, Japanese, and Korean (CJK) typography
- Fully extensible through open standards-based scripting languages
